

SPACE
zanotta

'Zanotta came to the fore in the heady days of the 1960s blasting onto the scene with 'Sacco', the original bean bag, and 'Blow', the world's first inflatable chair: designs that changed a generation and shaped Zanotta into the likable protagonist we know today.'

You are invited to celebrate the latest collection from Zanotta.

Please join us for some lively discussion – with Karen McCartney, Editor of Inside Out magazine; Anne Watson, Curator of Design and Architecture at the Powerhouse Museum; Kevin Jarrett, Founder and Managing Director of Space Furniture; and Martino Zanotta, head of Zanotta Italy – on the optimism and radical ideas that re-shaped art, design and culture during the 1960s, and the continuing impact on design today.
