

ATTENTION PRIMARY TEACHERS

Book for Term 3 and receive a free *Special FX* video and a free Powerbriefing

Special FX: secrets behind the screen will engage your students' imaginations in the exciting world of movie-making.

Special FX is as educational as it is a fun end-of-term excursion. Students explore the science and technology used to create the illusions we see on screen and utilise their acting and improvisational skills.

With 25 interactive exhibits and six state of the art video exhibits, students can star in their own action-packed 'mini-movie'. The video exhibits use the same 'blue screen' technology used by film directors and editors to blend suspenseful action and extraordinary backgrounds with amazing effects.

Other exhibits in *Special FX* will reveal the secrets behind 3D animation, morphing, voice and sound manipulation and time lapse photography.

Students will be able to animate their own Jurassic Park, take a 3D virtual ride on a futuristic roller coaster, make a stop animation using Lego models, or morph screen goddess Marilyn Monroe into Frankenstein!

The students' performances can be recorded on a free video as a memento of your class visit.

Accompanying the exhibition is a comprehensive set of teachers notes and classroom activity guide.

When booking, consider making a day of it with any of our combined visit packages with:

- multimedia workshops in the SoundHouse VectorLab
- big screen movies at IMAX Theatre
- studio tours at the ABC Ultimo Centre
- 3D Space Theatre at Sydney Observatory.

CHARGES:

***Special FX* exhibition:** \$8 per student including free Museum admission. Supervisors free.

***Special FX* video:** 1 free per 20 students. Additional videos available for purchase @ \$8 each.

Ask about available Powerbriefings when booking.
